UPDATING VERSION 4.0.600	5
Sage XRT Common Services	5
Sage XRT Bank Format Library	6
Sage XRT Treasury	6
UPDATING ALL VERSIONS	10

Foreword

There are two update methods depending on your version of the product:

- **Silent Update** mode only as of version 4.0
- **Uninstall/Install** mode for all versions

Guidelines

- You must be the **Administrator** of the stations to perform the installations.
- The **User Account Control** of the station/server must be deactivated during installation.
- You must have all the rights on the folders related to **Sage XRT Treasury 4.0.600**.
- Close all other applications before launching the installation of **Sage XRT Treasury 4.0.600**.
- The database engine must be installed and activated before you start the installation.
- The names of the application installation and data folders must not have accented or non-ASCII characters.
- Back up your data before upgrading any application.

Here is the update order for **Sage XRT Treasury 4.0.600** products:

1. **Sage XRT Common Services 3.9.201**
2. **Sage XRT Bank Format Library 2.1.204**
3. **Sage XRT Communication 4.0.400**
4. **Sage XRT Signature 4.0.400**
5. **Sage XRT Treasury 4.0.600**

Updating Version 4.0.600

Do not forget to back up your databases before any modification.

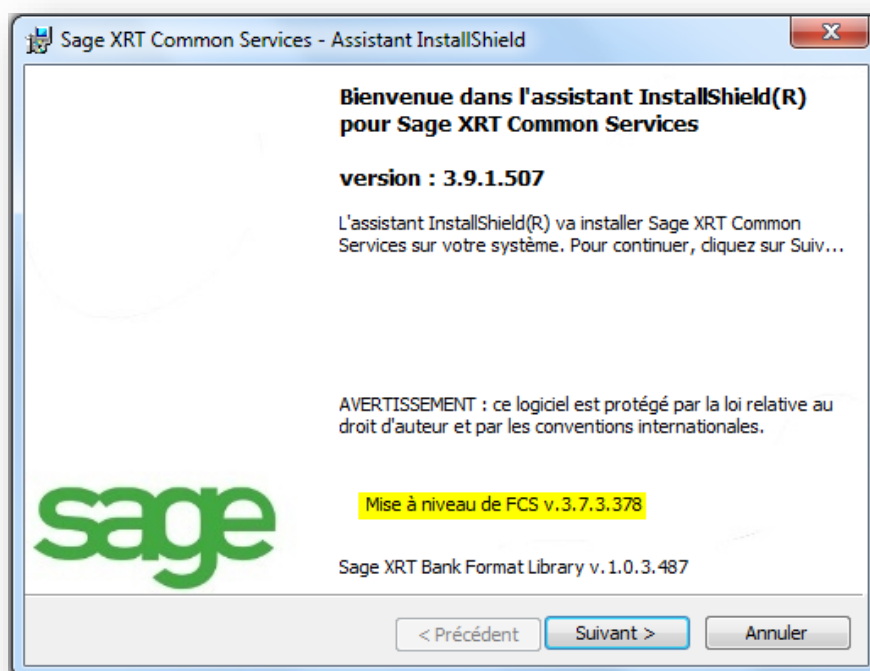

This update method does not allow the installation of the options you did not select (**XRT WCF Services** and **Reporting**).

Mandatory step order:

1. Update the new version of **Sage XRT Common Services 3.9.201**.
2. Update the new version of **Sage XRT Format 2.1.204**.
3. Update the new version of **Sage XRT Treasury 4.0.600**.

Sage XRT Common Services

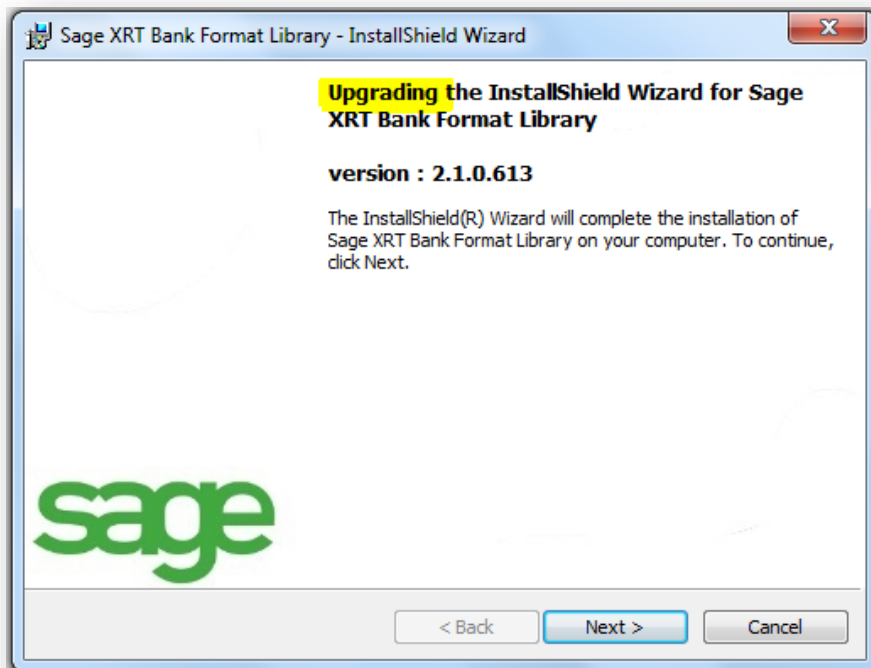

Run the update for the common services: **Sage XRT Common Services (SCS)**, following the guidelines from the installation guide on the DVD.

The highlighted lines confirm this is a proper update (not the first installation).

Sage XRT Bank Format Library

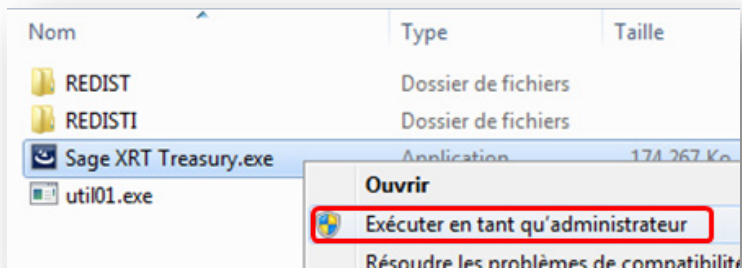

Run the update for the common services: **Sage XRT Bank Format Library (BFL)**, following the guidelines from the installation guide on the DVD.

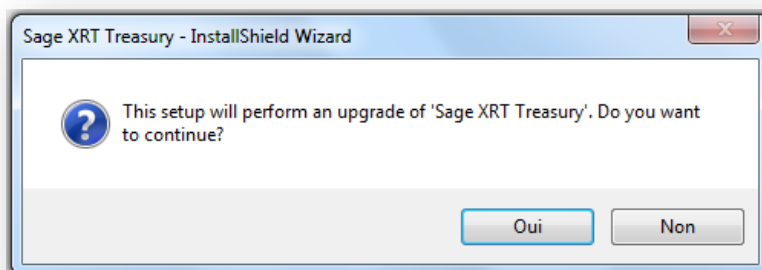

The highlighted lines confirm this is a proper update (not the first installation).

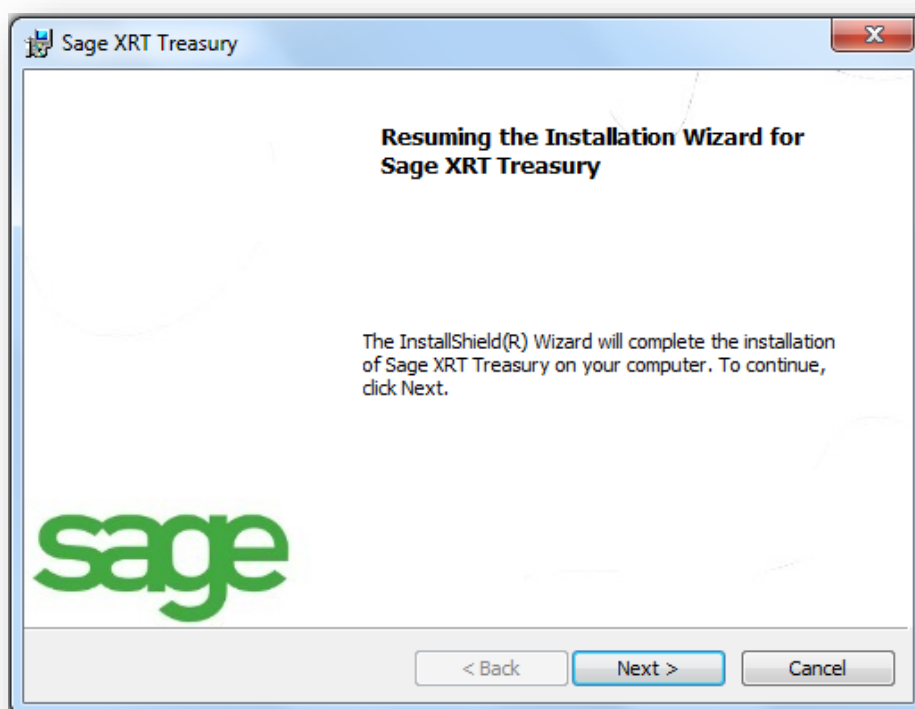

Sage XRT Treasury

This update works just like a first installation by executing the **Sage XRT Treasury.exe** (on the DVD) as an administrator:

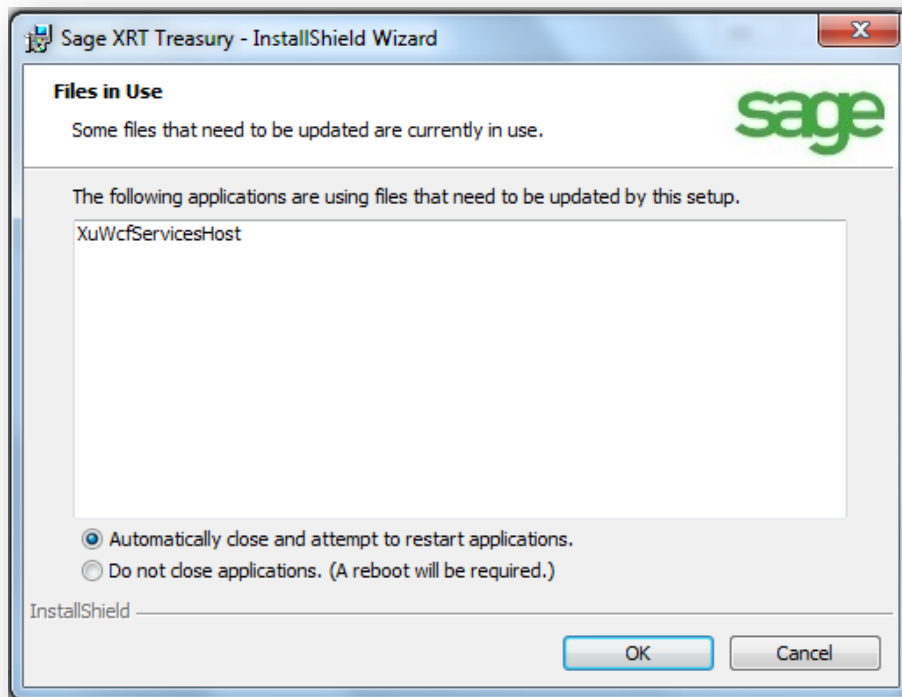

Select **Yes** to continue the installation.

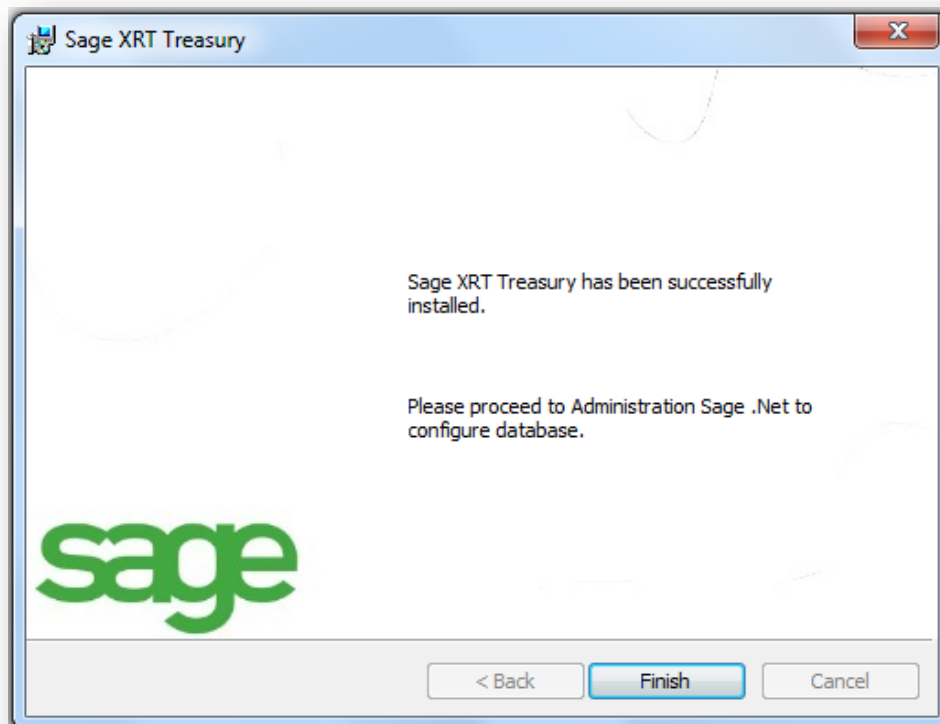

Click **Next**.

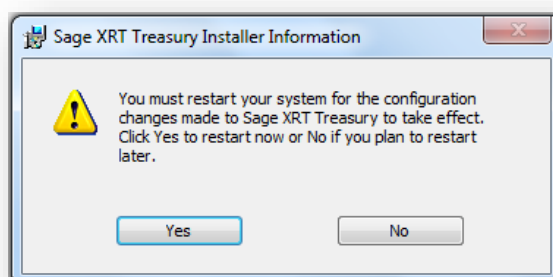

The following window is displayed only if the service had already been installed and activated.

Click **OK**.

Click **Finish**.

Click **Yes** to restart your computer.

Updating All Versions

Do not forget to back up your databases before any modification.

This update consists of both a removal and an installation of the products.

Mandatory step order:

1. Remove **Sage XRT Treasury** or **Sage FRP Treasury Universe**.
2. Remove any old version of the common services and BFL.
3. Install the new version of **Sage XRT Bank Format Library 2.1.204**.
4. Install the new version **Sage XRT Common Services 3.9.201**.
5. Install the new version **Sage XRT Treasury 4.0.600**.

Please follow the guidelines in *SXT.4.0.600.SetupGuide_EN.docx*.
